)	
Annual Assessment of the Status of)	MB Docket No. 06-189
Competition in the Market for the)	
Delivery of Video Programming)	

COMMENTS OF Hoffman Estates, Illinois

These Comments are filed by Hoffman Estates, Illinois in support of the comments filed by the National Association of Telecommunications Officers and Advisors ("NATOA"), the National League of Cities ("NLC"), the National Association of Counties ("NACo"), the United States Conference of Mayors ("USCM") and other national municipal organizations. Like NATOA, Hoffman Estates believes that local governments want and encourage competition in the video programming marketplace. The local franchising process works and helps to ensure that all residents share in the benefits that increase competition brings to a community.

Our community previously filed Comments in the franchising proceeding, MB Docket No. 05-311, the implementation of Section 621 (a)(1) of the Cable Communications Policy Act of 1984 as amended by the Cable Television Consumer Communications Protection and Competition Act of 1992. Because this Notice of Inquiry raises many of the same issues that were addressed by our earlier Comments, we are attaching a copy of those Comments for inclusion in this proceeding.

The local cable franchising process functions well in Hoffman Estates and it ensures that our community's specific needs are met and that local customers are protected. While we applaud efforts to increase competition in the video programming marketplace, the Commission should do nothing to impair the operation of the local franchising process as set forth under the existing federal regulatory scheme. The local Cable franchising process should not be used as an excuse for the failure of new cable, or other video service providers, to enter into the marketplace.

Hoffman Estates is currently in negotiations with AT&T to provide service to our community. I hope that the FCC will not do anything to undermine this process.

Respectfully submitted,

Village of Hoffman Estates,

Illinois
